

PEACE DECLARATION

Hokkaido University of Education Kushiro Attached Junior High School

We ask everyone all over the world. What is the Peace? Do you think that it is usual for you to live? You cannot answer the question. You have to realize about the Peace again.

Because of the atomic bomb at 11:02 a.m., August 9, 1945, there were people who lost their usual lives.

At that time, 240 thousand people lived in Nagasaki, however, 73,884 people died, 74,900 people were injured. It was feared not only the damage from the bomb blast but also the influence of radioactivity, and we lost a large number of people. There were young boys and girls who lost their hair because of the radioactivity. There were people who tried to save his family and took care of them hard even he was seriously hurt.

We have known the facts. We shouldn't think that they were pity like just an affair of other people. We have to think of their feelings and wishes. We are alive, and we have to recognize the wars and the nuclear problem. We think that is the way to be able to make the world really peaceful without wars.

We faced the fact which happened 68 years ago. We will live as hard as we can. We will build the world peace for people who were sacrificed during the war and told us the way to the peace; For our future, and for our children. Do not fade the memory of the history. We swear to keep praying for the world peace without nuclear weapons.

We will make the peaceful future.
